

Static Compressive Strength Curve for 20 g/l Foam Molded from ARPAK[®] Expanded Polyethylene (EPE) Beads

Note: 20 g/l = 1.25 pcf = 45X (g/l = grams per liter; pcf = pounds per cubic foot; X = foam expansion ratio)
 1 MPa = 1 N/mm² = 145.04 psi (Units of pressure/stress)
 Test Speed at 12.5 mm/minute (per ASTM-D3575)
